

## Latex Tutorial 8 (Examples) - Page Layout

Andrew Roberts

1st October 2003

Using the `fancyhdr` package, I have redefined the header to display my name and the date, whilst the page number appears at the bottom-right of every page.

Also, using the `lastpage` package, I can easily create a 'n of m' style numbering at the bottom (not that I normally would, it's just for show!)
